EMPLOYMENT HISTORY

Meridian Energy

From June 2026 to now

Data Platform & Engineering Lead

MAS Medical Assurance Society

From September 2024 to June 2026

Leading the architecture **design and delivery of data-driven technology transformation**, including the introduction of a **near real-time operational data store**, future-focused approach to **system integration and cross-system data mastery**, and heavily involved in the wider **technology transformation programme** including supporting both a **CRM and Insurance Policy Administration System (PAS) migration**. Supported the Data team in general, including **acting Head of Data**, Lead Data Engineer support, mentoring of junior team members, **platform security and infrastructure hardening**, and **driving best practices in data engineering and DevOps**.

Solutions Architect (Data)

Professional Services, Qrious Limited (NZ)

From November 2022 to September 2024

Led **delivery of many modern data platforms and data products** across a range of technologies and government and private sector clients. Involved with significant amount of **pre-sales activities**, from **solution architecture design**, to **project scoping, costing and proposal writing**. Managed a team of **data consultants**, from junior to senior consultants. **Drove automation and repeatable infrastructure-as-code initiatives** to bring innovation to project delivery, ensure platform implementation consistency and capture reusable assets.

Principal Consultant

Led the **architecture design and platform delivery** of **Microsoft Fabric**-based modern data platform for multiple large organisations. Led the architecture design and platform delivery of **Azure Databricks** for analyst workloads in a **large NZ government organisation**. Delivered multiple modern data platform implementations across **Fivetran, Azure, Snowflake, Azure Databricks, Coalesce and DBT** using **Infrastructure-as-Code**.

Digital Lighthouse, KPMG New Zealand (NZ)

From August 2019 to November 2022

Led and delivered **Data and Analytics** projects for **public and private sector clients**. **Drove internal innovation** to **increase delivery capability and technical maturity**. Fostered a culture of **learning and collaboration** through mentoring.

Associate Director

From April 2022 to November 2022

Chapter Lead for Engineering. Led **business development** and **engagement delivery**, and identified and delivered **strategic investments in technology and mentoring** to ensure **delivery capability and capacity**. Managed relationships with senior client stakeholders to ensure **effective delivery of complex engagements**.

Senior Manager

From April 2021 to March 2022

Solution design and delivery of end-to-end **analytics platforms** for public-sector clients. Delivered **zero-trust platform architectures** of PaaS and IaaS infrastructure. Developed **large-scale data processing pipelines** in **Apache Spark** to support client data modelling.

Manager

From August 2019 to March 2021

Led **client project delivery**, from Azure Cloud architecture and infrastructure automation, to back-end application development and data reporting. Increased the **technical maturity of the team**, running **workshops and designing best practices for delivery**.

Cox Automotive (UK)

From November 2016 to August 2019

Data Engineering team lead, supporting Business Intelligence (BI) and Data Science (DS) teams with data and platforms to enable effective business analytics. Enabled principle of self-service analytics and ETL development for BI and DS teams (summarised in a talk given at the Spark Summit 2019 (youtu.be/1WUlua-xjJA)).

Lead Data Engineer

From April 2018 to August 2019

Delivered and supported data-driven platforms, pipelines, and products across BI and DS teams. Performed zero-downtime platform migration from Cloudera (IaaS) to Azure Databricks (PaaS). Was a core contributor to Waimak, an open-source Apache Spark library (github.com/CoxAutomotiveDataSolutions/waimak).

Hadoop DevOps Engineer

From November 2016 to March 2018

Automated deployment of Cloudera platform, and migrated platform onto a secure platform (Kerberos, SSL, RBAC). Responsible for all automation of project and environment builds and deployment.

Hortonworks (UK)

From December 2015 to November 2016

Professional services consultant providing Hadoop implementation, administration and developer services to banking-sector clients.

Senior Consultant

British Gas (UK)

From September 2013 to November 2015

Developer and Platform Engineer delivering ETL pipeline development, and infrastructure and platform automation to support large on-premises Hadoop clusters.

Hadoop Platform Engineer

From January 2015 to November 2015

Graduate Hadoop Software Developer

From May 2014 to January 2015

Graduate SAP Developer

From September 2013 to May 2014

MPHys, Masters in Computational Physics with Honors

University of Edinburgh

Masters Project Radiative Transfer on GPUs using NVIDIA CUDA

Senior Honors Project Lattice QCD on GPUs using NVIDIA CUDA

Microsoft Certified: Fabric Data Engineer Associate	Microsoft Certified: Azure Security Engineer Associate
Microsoft	Microsoft
Valid from December 2025 to December 2026	Valid from September 2020 to September 2023
Microsoft Certified: Azure Solutions Architect Expert	Microsoft Certified: Azure Developer Associate
Microsoft	Microsoft
Valid from February 2022 to February 2025	Valid from February 2024 to February 2025
Microsoft Certified: DevOps Engineer Expert	Microsoft Certified: Azure Administrator Associate
Microsoft	Microsoft
Valid from January 2022 to January 2025	Valid from January 2022 to January 2025
Microsoft Certified: Azure Data Engineer Associate	SnowPro Core Certification
Microsoft	Snowflake
Valid from April 2024 to April 2026	Valid from November 2023 to November 2025
Microsoft Certified: Fabric Analytics Engineer Associate	SnowPro Advanced: Architect Certification
Microsoft	Snowflake
Valid from May 2024 to May 2025	Valid from August 2024 to August 2026

Data Engineering

Apache Spark, Databricks, Snowflake, Microsoft Fabric, dbt, and SQL

Software Engineering

Scala, Python, C#, TypeScript, and Functional Programming

Cloud Engineering

Azure, and AWS

DevOps / Automation

Azure DevOps, ARM / Bicep, GitHub, and Terraform

Infrastructure / Platform

Linux / Unix, Bash, Networking, and Dynamics 365

Soft Skills

Solution Architecture and Platform Design, Agile Project Delivery, Requirements Gathering, Technical Writing, Workshop Facilitation, and Data Modelling
